A CONVERSATION WITH DR. DREW CARRELL, LAKEVIEW FAMILY DENTISTRY

Q *What inspired you to start your own dental practice, and what sets it apart?*

A Growing up, my father was a dentist in a small town, which gave me a great sense of what it means to be part of a community. This was my initial inspiration for owning a dental practice and serving others. As a locally owned business, we are active supporters of our community. Professionally, I have always believed in investing in myself to advance my knowledge and education. I love dentistry and love what I do. It starts with listening to each patient and their individual concerns or desires and tailoring a treatment plan that delivers on those goals.

Q *Are there any cosmetic dentistry trends we should know about?*

A Yes! With advancements in clear braces such as Invisalign, we are able to first straighten and align crowded or rotated teeth before completing veneers. This allows us to be more conservative with options like no-preparation veneers. Unlike traditional veneers, no-prep veneers do not require any drilling on enamel and still allow us to lengthen teeth and broaden a patient's smile.

Q *What is your vision for the future of your dental practice?*

A Our team will continue to build relationships by providing high-quality, long-lasting dentistry. We embrace the most current techniques and technologies to provide the very best services and experiences for our patients.
